

## Bactafree – S | Product FAQs

### Best Disinfectant Tablets For Fruits, Vegetables & Packed Food

#### 1. What are Bactafree- S tablets?

Ans. Bactafree-S are tablets, formulated with sodium dichloroisocyanurate which is best for disinfecting vegetables, fruits and packaged food.

#### 2. How does Bactafree-S disinfect vegetables and fruits?

Ans. The NaDCC present in Bactafree-S tablets dissolves in water, liberating hypochlorite ions, which are normally used in public health for drinking water purification. So washing fruits & vegetables with chlorine solution has been shown to reduce the number of microorganisms present on their surfaces.

#### 3. Does it decrease the vegetable / fruits storage life?

Ans. No, Bactafree-S has no effect whatsoever on the storage life of vegetables & fruits. Its purpose is to remove the germs & chemicals present on the surface of raw fruits and vegetables.

#### 4. How can I disinfect leafy vegetables?

Ans. Add 1 tablet in 15 liters of water and submerge the leafy vegetables for 5 to 10 minutes. Clean the vegetable with water or rinse with cloth, brush.

#### 5. Can it be used to disinfect packaged food?

Ans. Yes, you can use the Bactafree-S tablet solution to disinfect packaged food.

#### 6. How long does it take to disinfect vegetable and fruits?

Ans. It takes 5 to 10 minutes to disinfect vegetable and fruits

#### 7. Can I use it to disinfect salad?

Ans. It is advisable to first disinfect the vegetables with Bactafree-S solution and then cut them to use as salad.

#### 8. Which water to use? Tap water or drinking water?

Ans. Bactafree-S works with both tap water and drinking water.
